

Please do not accept NAB's petition 04-160 regarding satellite radio services. The lousy, cookie-cutter, mind-numbing offerings of commercial radio in America today have driven me forever from the dial. I am a loyal subscriber to XM and will never go back to broadcast radio. How dare they try to dictate what I am able to hear from a PAY service. Isn't that what America is all about? Someone offers a service of value, and I buy it. NAB offers crap and I don't buy it, and now they want you to "protect" them. Baloney. Let them wither and die on the vine. Besides, you have better things to worry about. Thanks for your attention.
